

UNIVERSAL BIO ODOUR REMOVER

SCOPE OF APPLICATION

APPLICATION TYPE

PACKAGING CODES

GEF-031-00-1005 1 x 5 Liter

DOSAGE

pH-neutral

1:1

ready-to-use

Description

Universal Bio Odour Remover is a powerful biotechnological odour absorber. It removes and neutralizes bad odours.

Scope of application

Universal Bio Odour Remover is suitable for applications in waste compactors, garbage bins, garbage-collecting trucks etc. It is also ideal for all bad smelling surfaces based on leaking liquids, faeces, vomit etc.

Technology

The applied technology is based on competing bacterial cultures specifically formulated for the rapid decomposition of organic matter. A key feature of these crops is the rapid growth and colonization of the treated areas, before malodorous microbial species degrade the organic material and bad odours can form.

Dosage

Ready-to-use.

Instructions for use

Manual application for surfaces, garbage and other waste materials

1. Please clean the affected areas to achieve best cleaning results.
2. Moisten the surface with some sprays.
3. Repeat if necessary.

Cleaning instructions

- Please note our dosing recommendation, as this saves costs and protects the environment.
- Do not mix Universal Bio Odour Remover with other cleaners.
- Avoid the use of harmful substances Chlorinated cleaning agents on floor coverings.
- Always clean, starting from the top down or from the cleanest to the dirtiest area.
- Do not use the cleaner on natural floors and unvarnished wood floors (gray haze possible).
- Leave the installation of the bee*pure® dosing system to our service staff.

Composition

<5% non-ionic surfactants, bacterial cultures, perfume, preservatives.

For professional use only.
